Education

BS Artificial Intelligence, NFC
Institute of Engineering & Fertilizer
Research (Expected 2028)

Skills

- Artificial Intelligence
- Machine Learning
- Deep Learning
- Computer Vision
- Data Analysis
- Data Preprocessing
- Feature Engineering
- Model Training
- Model Evaluation
- Predictive Analytics
- Image Processing
- Convolutional Neural Networks (CNNs)

Tools

- Python
- Scikit-learn
- TensorFlow
- Keras
- OpenCV
- Pandas
- NumPy
- Jupyter Notebook
- Git
- GitHub
- Visual Studio Code
- Google Colab

Soft Skills

- Problem Solving
- Critical Thinking
- Communication
- Teamwork
- Time Management

Language

- English (Fluent)

Muhammad Ahmad

AI & Machine Learning Enthusiast

Motivated and detail-oriented Artificial Intelligence undergraduate with a strong foundation in Python, Machine Learning, and Artificial Intelligence. Passionate about developing intelligent systems, training predictive models, and solving real-world problems using data-driven approaches. Strong problem-solving skills with hands-on experience in building end-to-end machine learning projects. Seeking an AI/ML internship or entry-level position to contribute technical expertise while continuously learning emerging AI technologies.

Work Experience

Self-Employed AI/ML Engineer

Present

- Develop and train machine learning models for predictive analytics.
- Perform data preprocessing, feature engineering, and model evaluation.
- Build classification and regression models using Python.
- Work with machine learning libraries including Scikit-learn, Pandas, and NumPy.
- Optimize model performance through experimentation and hyperparameter tuning.
- Continuously learn and implement modern AI and machine learning techniques.

Projects

Credit Scoring Model

Description:

- Developed a machine learning model to predict customer creditworthiness using historical financial data.
- Performed data cleaning, preprocessing, and feature engineering.
- Trained and evaluated multiple classification algorithms to improve prediction accuracy.
- Compared model performance using standard evaluation metrics.
- Implemented the complete project in Python using Scikit-learn, Pandas, and NumPy.
- Documented the project and published the source code on GitHub as part of the CodeAlpha Machine Learning Internship.

Handwritten Character Recognition System (Current Project)

Technologies: Python, TensorFlow/Keras, OpenCV, NumPy, Pandas

Description:

- Developing a deep learning model to recognize handwritten English characters and digits.
- Preprocessing image datasets using grayscale conversion, resizing, normalization, and augmentation techniques.
- Training a Convolutional Neural Network (CNN) for high-accuracy character classification.
- Evaluating model performance using accuracy, precision, recall, confusion matrix, and loss curves.
- Building a scalable computer vision pipeline for handwritten text recognition.
